

To All Shareholders,

As a reminder, for those that have them, please take the time and responsibility for maintaining the jalousie windows along the interior walkways. I'm sure many of those windows are in dire need of cleaning and lubrication. As time passes it will become more difficult to repair or replace this style of window, which to most is a unique and desirable feature to our building. To help you with this important activity, Please call Joe Lemesevski at 609-284-7276. Joe is a fully insured contractor/handyman who has already provided window maintenance on several units here at Palm Worth. Joe also has expertise in many other trades that you may need.

Secondly, for those that have hurricane shutters, the same responsibility applies. Maintenance is important to keep them operating properly. It wouldn't be a good time to find out they didn't work with a storm bearing down. If you don't have a contractor lined up, try calling Impact Shutters in Lake Worth. Their number is 561-436-3005.

Anyway, that's it for now. See you around the premises.
