

To All Shareholders:

Everyone needs to be aware that wipes and paper towels of any kind are not to be flushed down the toilet. Sunday morning we had a sewer backup that could have been a disaster but for the vigilance of one resident. A plumber was called and the problem was alleviated, which costs the building a lot of money for an emergency Sunday call to the plumber. This time!

Please see the pic below of what wipes and paper towels do to the sewer line.

This can be very dangerous to the first floor residents so please, please be careful and do not flush wipes down the toilet.

Thanks for your understanding.
