

10 June 2024

TO: All Shareholders

There have been a couple inquiries concerning using individual AC companies. Because of the number of units involved as well as time and cost involved, it was beneficial to contract with one electrician to do the repair to the electrical. Involving numerous different AC companies who in turn would need to secure electricians was not feasible or an option. Palm Worth has contracted with the electrician, Tom Anders, who has secured the required Electrical Permit under the Best Roofing Permit and has met with the Town Inspector. In addition, he is working with Best Roofing in handling their required additional brackets as well as their portion of the work.
