

Dear Shareholder,

The Town of Palm Beach building/permit department has required Palm Worth to correct/repair the electrical boxes as well as the AC electrical lines of all involved units. The roofing permit as well as the electrical permit under that permit will not be released/approved until the work is completed. Palm Worth has contracted with an electrician to perform the repair and corrective work for the units involved in order to secure the release of the Roofing Permit. Individual Units are responsible for the maintenance and condition of their equipment on the roof. Therefore, work per unit is being noted and logged in as it pertains to a specific unit. Shareholders will be billed for reimbursement once the work is done, see sample pictures of work that will need to be conducted to pass the permit inspection. Thank you for your cooperation in solving this matter.

*Thank you,*  
*Mike Guzman*
