

CAPB Seminar:

Palm Beach Shore Protection & Coastal Resilience

From statewide policy to South End realities: balancing protection and resilience along Palm Beach's shoreline.

The Citizens' Association of Palm Beach invites members and residents to a must-attend public policy seminar focused on one of the most consequential issues facing our town: shore protection, coastal resilience, and the future of Palm Beach's shoreline.

This timely discussion will explore how statewide coastal strategies translate into local action — and what those decisions mean for Palm Beach residents, associations, and neighborhoods, including the South End.

Thursday, January 22

10:00 a.m.

Palm Beach South End Fire Station

- Florida's statewide and regional coastal strategy
- Palm Beach-specific shoreline conditions and dune protection efforts
- How coastal planning moves from concept to execution at the Town level
- Risk mitigation, insurance market considerations, and regulatory trends
- Practical takeaways for condominium boards, associations, and residents

Palm Beach Focus:

Melissa Ceriale, former chair of the Shore Protection Board of Palm Beach

A closer look at local shoreline conditions, dune systems, and protection strategies under consideration.

Lake & Coastal Science Perspective

Bob Hamilton, President, Woods Hole Group

An expert examination of shoreline science and applied coastal solutions, drawing on Woods Hole Group's active work on Lake Worth Lagoon and shoreline-related projects. This segment will bridge global and regional coastal science with practical, real-world applications relevant to Palm Beach and similar coastal communities.

Insurance & Risk Insight

Brandon Lynch, Plastridge Insurance

An actionable breakdown of what associations and residents should be thinking about now — from regulatory alignment to real-world risk considerations.

Space is limited. Early registration is encouraged.
